DETAILED ACTION

Applicant's Amendment filed on 10-8-03 has been received and entered in the case. The rejections set forth in the previous Office Action are maintained as indicated below.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by the Hattangadi reference (U.S. Patent 5,087,835).

The Hattangadi discloses in figure 1 an apparatus comprising a filter module P1 operably coupled to received an input logic signal (RESET) for producing a pulse signal at line 56; and a latch module 20 operative coupled to receive the pulse signal for latching the pulse signal as claimed in claims 1 and 6.

As to claims 2 and 3, figure 1 show soft latch module 20 comprising a first inverter I5; and a second inverter I6 having an output impedance (resistor coupled to I6), wherein an input of the second inverter is coupled to an output of the first inverter, and wherein the pulse signal is received at the coupling of the input of the first inverting logic element and the output impedance.

Response to Arguments

3. Applicant's arguments filed 4-7-03 have been fully considered but they are moot in view of new ground of rejection.

Allowable Subject Matter

4. Claims 9-18 are allowed.

5. Claims 4, 5, 7 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to disclose an apparatus comprising elements being configured as recited in claims. Specifically, none of the prior art teaches or suggests, among other things, the following limitations:

- A specific configuration of a filter module (i.e., capacitor, gating device, and relationships of impedance) as recited in claims 4 and 17.
- A second filter module limitation as recited on claim 7.
- An input gating device and a processing module as required by claim 9.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2816

In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
